

*Flo*MAX High Flow Series Connectors Helping Prevent Cross Contamination

*Flo*MAX High Flow Series connectors consist of 7 color-coded non-interchangeable nozzle and receiver sets. The proprietary design helps prevent cross contamination of fluids of non-mating connectors. The connectors are manufactured using 100% metal components. All wear components are stainless steel and the non-wear components are aircraft grade anodized aluminum. The billet aluminum caps are O-Ring sealed for greater contaminant resistance.

Maximum flow rate of 113 gpm
(using ISO 46 hydraulic oil)

500 psi working pressure

1500 psi burst pressure rated

1" NPT male & female threaded connectors
